mexican immigration to the united states the oldest and largest immigration movement to this country is in the midst of a fundamental transformation for decades mexican immigration was primarily a border phenomenon confined to southwestern states but legal changes in the mid 1980s paved the way for mexican migrants to settle in parts of america that had no previous exposure to people of mexican heritage in new destinations editors victor zúñiga and rubén hernández león bring together an inter disciplinary team of scholars to examine demographic social cultural and political changes in areas where the incorporation of mexican migrants has deeply changed the preexisting ethnic landscape new destinations looks at several of the communities where mexican migrants are beginning to settle and documents how the latest arrivals are reshaping and being reshaped by these new areas of settlement contributors jorge durand douglas massey and chiara capoferro use census data to diagram the historical evolution of mexican immigration to the united states noting the demographic economic and legal factors that led recent immigrants to move to areas where few of their predecessors had settled looking at two towns in southern louisiana contributors katharine donato melissa stainback and carl bankston iii reach a surprising conclusion that documented immigrant workers did a poorer job of integrating into the local culture than their undocumented peers they attribute this counterintuitive finding to documentation policies which helped intensify employer control over migrants and undercut the formation of a stable migrant community among documented workers brian rich and marta miranda detail an ambivalent mixture of paternalism and xenophobia by local residents toward migrants in lexington kentucky the new arrivals were welcomed for their strong work ethic so long as they stayed in invisible spheres

by 1988 the mexican origin population of the united states had grown to 12 1 million largely from recent sharp increases in immigration the policy concerns raised by this phenomenon have been influenced by some perceptions that available research contradicts today most mexican immigrants come to stay about half are female and they have increasingly less schooling compared with the native born workers and across generations their language and political assimilation is proceeding well they put greater demands on education than on other public services however the mexican origin population affects the economy and public services more and differently in the areas where it is concentrated primarily in the western united states and large urban areas further the recent legalization of 2 3 million mexican immigrants can be expected

to increase the demand on public services especially in those areas

this study to assess the current situation of mexican immigrants in california and project future possibilities constructs a demographic profile of the immigrants examines their economic effects on the state and describes their socioeconomic integration into california society models of immigration integration processes are developed and used to project future immigration flows the study s major conclusion is that widespread concerns about mexican immigration are generally unfounded mexican immigrants are not homogeneous and they differ in their characteristics and their effects on the state overall the immigrants provide economic benefits to the state and native born latinos may bear the brunt of competition for low skill jobs in general immigrants contribute more to public revenues than they consume in public services however the youthfulness of the population their low incomes the progressiveness of the state income tax structure and the high costs of public education produce a net deficit in educational expenditures continued rapid immigration from mexico and projected shifts in the industrial and occupational structure of california could disrupt the traditional mobility process of immigrants these changes will make education an increasingly important key to the occupational and social mobility of mexican immigrants children and grandchildren nec
